

## Course Outline - **Visual Basic**

**Aims:** To provide delegates with a solid foundation upon which to build Windows applications using Visual Basic. Delegates learn the fundamentals of programming in Visual Basic through the many practical demonstrations and modules of the course.

**Pre-requisites:** A working knowledge of the Windows environment and the ability to launch applications from the Program Manager, manipulate the desktop and its menus. Exposure to a programming language would be desirable but is not essential.

**Duration:** Three days

- Basic Concepts
- Creating Applications
- Writing Visual Basic code
- Language Fundamentals
- Using Operations
- Making Decisions, Looping n and Jumping in Code
- Working with Numbers and Strings
- More on Subs and Procedures
- Working further with Arrays and Structures
- Handling Errors and Debugging Code
